

## Mouse Food Storage Tips

**Keep your mouse's food fresh with these tips.**

*By Audrey Pavia*

Tip 1: Keep your mouse's pellets or food blocks in a secure container where it's cool and dry.

Tip 2: Don't buy more than one or two month's worth of food for your mouse at a time, because the food loses its nutritional value when stored for too long.

Tip 3: Wash your mouse's food and water bowls daily, being sure to throw away any uneaten food.

Tip 4: Replace uneaten food daily, and dispose of fresh food after a couple of hours.
